

List of Figures

	<u>Chapter - Page</u>
Fig. 1 - 1: Standard Turntable Power Washer, View 1.....	1-3
Fig. 1 - 2: Standard Turntable Power Washer, View 2.....	1-4
Fig. 1 - 3: Rinse System	1-15
Fig. 1 - 4: Float-Level Mechanics.....	1-18
Fig. 1 - 5: Water Level Differences At Four Positions	1-19
Fig. 1 - 6: Washer Inspection Before Installation	1-25
Fig. 2 - 1: Raising the Power Washer by the Lifting Eyes	2-8
Fig. 2 - 2: Leveling and Anchoring Feet.....	2-11
Fig. 2 - 3: General Shim Placement, Top View of Base Frame.....	2-13
Fig. 2 - 4: Mounting the Combustion Burner (Up to 180,000 BTU).....	2-17
Fig. 2 - 5: Mounting the Combustion Burner (Up to 400,000 and 990,000 BTU)	2-18
Fig. 2 - 6: Burner Junction Box -- Wiring.....	2-19
Fig. 2 - 7: Steam Heat Source: Piping Sizes	2-21
Fig. 2 - 8: Steam Solenoid and Steam Trap Installation	2-22
Fig. 2 - 9: Water Connection Location	2-23
Fig. 2 - 10: Compressed-Air Connection	2-24
Fig. 2 - 11: General Layout of the Electrical Control Panel (Block Diagram)	2-26
Fig. 2 - 12: Steam-Exhaust Vent Pipe and Flue Pipe Attachments.....	2-29
Fig. 2 - 13: Auto Steam Exhaust (ASE) Piping and Blower Configurations	2-30
Fig. 2 - 14: Auto Steam Exhaust (ASE) Piping and Blower Assembly	2-32
Fig. 2 - 15: Installation for 1/4-HP or 2-HP Transition	2-33
Fig. 2 - 16: Installation for 1/10-HP Transition	2-33
Fig. 2 - 17: Proper ASE Transition to Avoid Condensation	2-34
Fig. 2 - 18: Wiring the ASE Blower Assembly.....	2-35
Fig. 2 - 19: Removable Door Position Lock Plate	2-39
Fig. 2 - 20: Door Position Lock Plate and Attachment Hardware	2-39
Fig. 2 - 21: Doorpost Support Without Lock Plate Attached	2-40
Fig. 2 - 22: Positioning the Door Lock Plate	2-40
Fig. 2 - 23: Tighten the Mounting Bolts.....	2-40
Fig. 2 - 24: Completed Lock Plate Installation	2-40
Fig. 2 - 25: Services and Connection Inspection	2-41
Fig. 2 - 26: Float Control Box.....	2-47
Fig. 2 - 27: Float Cam at Set-Point Water Level	2-48
Fig. 2 - 28: Water-Level Set-Point Dimensions and Measurement Location	2-49
Fig. 2 - 29: Initial Burner Settings	2-51

Chapter - Page

Fig. 2 - 30: Maximum Operating Temperature..... 2-59

Fig. 2 - 31: 400,000 BTU to 990,000 BTU Burner Diagram.....2-59

Fig. 2 - 32: Water Temperature Thermocouple Location 2-60

Fig. 2 - 33: Rinse Chemical Injector System.....2-68

Fig. 2 - 34: Annual Variations in Draft.....2-72

Fig. 2 - 35: Boiler Efficiency vs. Draft.....2-72

Fig. 3 - 1: Standard Turntable Power Washer Control Panel 3-4

Fig. 3 - 2: Water Temperature Controller & Read Out..... 3-5

Fig. 3 - 3: Cabinet Door Latch 3-7

Fig. 3 - 4: Cabinet Door Position Lock..... 3-8

Fig. 4 - 1: Maximum Actual Operating Temperature..... 4-12

Fig. 4 - 2: General Layout of the Electrical Control Panel (Block Diagram)..... 4-13

Fig. 4 - 3: Automatic Rinse Cycle (ARC) Timer Increments..... 4-15

Fig. 4 - 4: Rinse Flow Rate Chart..... 4-18

Fig. 4 - 5: Rinse Injector Pump Controls..... 4-19

Fig. 4 - 6: Rinse Water Flow Adjustment..... 4-20

Fig. 4 - 7: Standard Turntable Power Washer Control Panel..... 4-21

Fig. 4 - 8: Automatic Steam Exhaust (ASE) Cycle Timer Increments..... 4-23

Fig. 5 - 1: Service Schedule 5-3

Fig. 5 - 2: Cleaning the Pump Intake Filter Box.....5-6

Fig. 5 - 3: Lubrication Chart..... 5-7

Fig. 5 - 4: Cleaning and Replacing the PBM Nozzles..... 5-8

Fig. 5 - 5: Swivel Jam Nut - Non-adjustable Swivel..... 5-9

Fig. 5 - 6: Wash Pump and Pump Motor(s)..... 5-12

Fig. 5 - 7: Burner Blower Motor (180,000 BTU Burner Shown; Other
 Sizes Similar) 5-14

Fig. 5 - 8: Float Assembly..... 5-15

Fig. 5 - 9: Solenoid valves..... 5-17

Fig. 5 - 10: Turntable Drive and Turntable: Slip Clutch/Torque Limiter 5-19

Fig. 5 - 11: Cleaning the Heating Element..... 5-25

Fig. 6 - 1: Troubleshooting: Startup 6-3

Fig. 6 - 2: Troubleshooting: Ineffective Cleaning of Parts..... 6-4

Fig. 6 - 3: Troubleshooting: Wash Pump Motor Won't Start 6-5

Fig. 6 - 4: Troubleshooting: Wash Pump Surges..... 6-5

Fig. 6 - 5: Troubleshooting: Wash Pump Fails to Deliver Solution 6-6

Fig. 6 - 6: Troubleshooting: Wash Pump Motor Trips Overload -- High
 Amperage Reading 6-6

Fig. 6 - 7: Troubleshooting: Seal Leakage at Wash Pump Mounting Plate 6-7

Fig. 6 - 8: Troubleshooting: Wash Pump or Motor Vibrates or Is Noisy..... 6-7

Fig. 6 - 9: Troubleshooting: Water Does Not Heat (Gas/Oil Burner Does Not Ignite).....	6-9
Fig. 6 - 10: Troubleshooting: Water Does Not Heat (Steam).....	6-10
Fig. 6 - 11: Troubleshooting: Water Does Not Heat (Electric).....	6-10
Fig. 6 - 12: Troubleshooting: Turntable Does Not Rotate.....	6-12
Fig. 6 - 13: Troubleshooting: Nozzles -- Ineffective Cleaning.....	6-13
Fig. 6 - 14: Troubleshooting: Foaming.....	6-14
Fig. 6 - 15: Troubleshooting: PBM Not Oscillating.....	6-15
Fig. 6 - 16: Troubleshooting: Water Not Filling Reservoir, <u>or</u> Water Overflowing Reservoir, <u>or</u> System Not Heating.....	6-16
Fig. 6 - 17: Troubleshooting: Washer Will Not Start.....	6-17
Fig. 6 - 18: Troubleshooting: No Rinse Cycle.....	6-18
Fig. 6 - 19: Troubleshooting: ASE Will Not Operate.....	6-19
Fig. 6 - 20: Troubleshooting: ASE Leaks Liquid.....	6-19
Fig. 6 - 21: Troubleshooting: Electrical Control System.....	6-20
Fig. 7 - 1: Automatic Lubrication System.....	7-4
Fig. 7 - 2: Automatic Lubrication System Controller Interface.....	7-6
Fig. 7 - 3: Troubleshooting: Automatic Lubrication System Pump Does Not Run.....	7-8
Fig. 7 - 4: Troubleshooting: Automatic Lubrication System Pump Does Not Deliver Lubricant.....	7-9
Fig. 7 - 5: Center Manifold Mechanism and Superstructure.....	7-12
Fig. 7 - 6: Troubleshooting: Water Leaks Onto Cabinet Roof.....	7-15
Fig. 7 - 7: Troubleshooting: Center Manifold Assembly Does Not Work.....	7-15
Fig. 7 - 8: Troubleshooting: Center Manifold Light Does Not Illuminate.....	7-15
Fig. 7 - 9: Chemical Concentration Conductivity Probe.....	7-17
Fig. 7 -10: Troubleshooting: Peristaltic Pump Does Not Pump.....	7-21
Fig. 7 -11: Troubleshooting: Conductivity Cannot Be Maintained.....	7-22
Fig. 7 -12: Troubleshooting: Internal Reservoir Cover: Water Leaks Over Door Frame.....	7-24
Fig. 7 - 13: Troubleshooting: 50 Hz Electrical Power -- Squealing Sounds from Pump Area.....	7-27
Fig. 7 - 14: Troubleshooting: 50 Hz Electrical Power -- No Wash Cycle (No Water Pumped): Simplex Pump System.....	7-27
Fig. 7 - 15: Troubleshooting: 50 Hz Electrical Power -- Poor Cleaning Results <i>or</i> Abnormal Pump Noise: Duplex Pump System.....	7-28
Fig. 7 - 16: Micron Comparisons.....	7-30
Fig. 7 - 17: Troubleshooting: Wash Load Not Clean.....	7-32
Fig. 7 - 18: Troubleshooting: Solution Leaks from Filter Cover.....	7-32
Fig. 7 - 19: Setting Pump Pressure - Simplex Pump.....	7-34
Fig. 7 - 20: Setting Pump Pressure - Duplex Pump.....	7-35
Fig. 7 - 21: Pressure Control Panel.....	7-35
Fig. 7 - 22: Troubleshooting: Pump Motor Does Not Run.....	7-36
Fig. 7 - 23: HABO -- ASE Fan Installation.....	7-40
Fig. 7 - 24: HABO -- ASE Fan Installation.....	7-41

Chapter - Page

Fig. 7 - 25: Hot-Air Blow-Off (HABO) Inside Plenum 7-42

Fig. 7 - 26: Troubleshooting: HABO Heating Element Begins to Overheat 7-45

Fig. 7 - 27: Jib Crane, Rear-Mounted 7-47

Fig. 7 - 28: Rear-Mount Jib Crane: Bronze Bushing and Washer Location... 7-48

Fig. 7 - 29: Troubleshooting: Boom Does Not Swing Freely..... 7-51

Fig. 7 - 30: Door Mount Jib Crane Component Parts 7-53

Fig. 7 - 31: Washer Jib Crane, Door Frame Mount 7-54

Fig. 7 - 32: Door Frame Mount Jib Crane: Thrust Washers Location 7-55

Fig. 7 - 33: Troubleshooting: Door Frame Mount Crane Does Not Swing
Freely 7-57

Fig. 7 - 34: Oil Skimmer Assembly 7-59

Fig. 7 - 35: Troubleshooting: Skimmer-Wheel Does Not Skim 7-61

Fig. 7 - 36: Oil Coalescer Collection Chamber 7-64

Fig. 7 - 37: Oil Coalescer Reservoir and Regulator..... 7-65

Fig. 7 - 38: Oil Coalescer Pump Suction Filter 7-66

Fig. 7 - 39: Troubleshooting: Oil Coalescer Pump Not Pumping 7-67

Fig. 7 - 40: Troubleshooting: Excessive Water Removed with Oil..... 7-67

Fig. 7 - 41: Troubleshooting: Excessive Air Pumped into Oil
Coalescer Chamber 7-67

Fig. 7 - 42: Troubleshooting: Cleaned Solution Not Draining Back into
Washer Reservoir..... 7-68

Fig. 7 - 43: Troubleshooting: Power-Assist Does Not Activate 7-71

Fig. 7 - 44: Troubleshooting: Pump Pressure Gauge Does Not Work..... 7-73

Fig. 7 - 45: Rack and Fixture Set..... 7-75

Fig. 7 - 46: Small-Parts Basket..... 7-77

Fig. 7 - 47: Troubleshooting: Rinse Wand: No Hand Rinse..... 7-81

Fig. 7 - 48: Sludge Scraper -- External View 7-83

Fig. 7 - 49: Sludge Scraper -- Diagram of Parts 7-85

Fig. 7 - 50: Troubleshooting: Sludge Scraper Drag Chain Does Not
Move 7-86

Fig. 7 - 51: Airlift System in Sludge Scraper..... 7-87

Fig. 7 - 52: Troubleshooting: Airlift System is Not Functioning 7-89

Fig. 7 - 53: SHIM Manifold Selector Valve Schematic..... 7-91

Fig. 7 - 54: SHIM Manifold System - SR4063..... 7-92

Fig. 7 - 55: Troubleshooting: PBM not Oscillating 7-93

Fig. 7 - 56: General Schematic: StingRay Pure Water Option..... 7-95

Fig. 7 - 57: Pure Water System Components..... 7-96

Fig. 7 - 58: Feed Solenoid Bypass Lever 7-97

Fig. 7 - 59: Pump Bypass Screw 7-97

Fig. 7 - 60: Troubleshooting: Low Filter Pressure..... 7-100

Fig. 7 - 61: Troubleshooting: Low Permeate Flow 7-100

Fig. 7 - 62: Troubleshooting: High Permeate Flow 7-100

Fig. 7 - 63: Troubleshooting: Poor Permeate Quality 7-101

Fig. 7 - 64: Troubleshooting: No Water Fill in Washer..... 7-101

Fig. 7 - 65: Troubleshooting: Transfer Pump Runs Constantly..... 7-101

Fig. 7 - 66: Troubleshooting: Washer Fills Slowly 7-101
